the instant information on traffic and weather provided by xm radio is very much helpful to us truck drivers, or, anybody that is traveling on our nation's highways. we pay a subscription price for this programming so i feel it is our right to continue having this at our disposal. this information adds to our safety on the highways and helps police units when we change our routing due to accidents which alleviates possible back-ups and cogestion. so, please don't allow the removal of this service from the xm programming. thank you in advance.
